

# The SAVE Express

Welcome to the New Year 2011 edition of the SAVE Express

**Brief recap of 2010:**

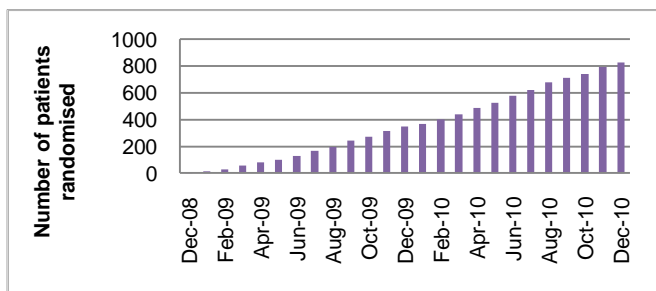

**India:** We are glad that India has successfully begun the Phase 1 recruitment in Dec 2010 with all our efforts. Our achievement has been in getting a clearance from the HMSC in Apr/Jul 2010, phase I initiations since May 2010, and equipment/software upgrade and successful beginning of screening of patients in the study.

**Global:** We have randomised 854 patients globally by the end of 2010.

▪ **NHMRC Supports the SAVE Trial**

It is with pride that we can let you know that the SAVE trial has received AUD\$2.9 million over 5 years from the NHMRC, which will see the study into 2014 and beyond.

▪ **Recruitment**

This global total of 854 patients is inclusive of Australia randomizing 124, New Zealand randomizing 26 patients and China randomizing 704 patients.

▪ **2011 Target**

The 2011 target for the India region has been set at 220 randomized patients. This equates to approximately two patients per site per month. We believe that with your perseverance, this can be achieved.

▪ **Congratulations!**

Heartiest congratulations to The Apollo Hospital at Hyderabad! Our FIRST centre to successfully begin screening for the SAVE study.

▪ **Recognition and Phase Plan**

Phase I	Phase II
Dr. Ramakrishnan N – NISS, Chennai (National Coordinator)	Dr. Man Mohan Mehndiratta G B Pant Hospital, Delhi
